Communications and  
Labor Market Information

- Iowa's seasonally adjusted jobless rate fell to a post-recession low of 4.2 percent in December from a revised November rate of 4.3 percent. The current rate is down from the year ago figure of 5.0 percent.
- The U.S. unemployment rate for December fell to a new post-recession low of 6.7 percent from 7.0 percent in November. The decline was due to a contraction of 347,000 in the nation's labor force.

## Iowa Unemployment Insurance Benefit Recipients

- The number of persons receiving regular UI benefit payments has declined from a high of 213,661 in 2009 to 124,005 in 2013.
- Three states—Florida, Georgia and Texas—accounted for about 80 percent of the nation's job growth in 2013.
- The preliminary data for 2013 show the U.S. economy added an average of 182,000 jobs each month last year, which is roughly equal to the pace maintained in 2012. All the gains took place in the private sector.

## Total Nonfarm Employment - Iowa

- The state's total nonfarm employment decreased by 2,400 jobs in December, falling to a level of 1,528,500. The drop was due primarily to seasonal declines in leisure and hospitality (-2,600) and construction (-1,900).
- Nonfarm jobs were up 12,800 from last December. Trade and transportation and professional and business services added the most jobs, up 5,000 and 4,900, respectively.
- Iowa's manufacturing employment rebounded in fourth quarter, and 2014 is expected to be a stronger year for the industry. Surveys conducted by the Chicago Fed and Institute of Supply Management indicate that sentiment among manufacturers is improving.
